

Ovintiv · Uinta basin

Trigger: Sustained high wind (curtailment-risk signal) · observed 2026-06-10

Opportunity ref #17305 · generated 2026-06-11

1 TRIGGER EVENT

EVENT	Sustained high wind (curtailment-risk signal)
OBSERVED	2026-06-10T23:00:00Z
MAGNITUDE	58.50 km/h wind
SIGNAL SOURCE	Open-Meteo historical weather archive · verify

This is a wind-speed observation used as an indicator of likely wind-farm curtailment in the area: an indicative signal, not a confirmed event at the asset.

2 ASSET

AREA	Uinta basin
RESOLUTION	Basin-level (signal centroid)
COUNTRY	US
COORDINATES	39.900, -110.250

Location shown is the centroid of 129 signal observations across the Uinta basin. This dossier resolves the opportunity to basin level; well- and lease-level identification is part of the operator conversation.

3a CORPORATE CONTEXT

CLASSIFICATION	Public (OVV)
PITCH GUIDANCE	Public company. No operational decision-maker is published in the filings we verify; the Decision-maker section below shows the contact route. Expect final sign-off to route through corp-dev and the board, so anchor the pitch in field economics, not an investor story.
EVIDENCE	Listed equity (ticker OVV); SEC registrant CIK 0001792580.
SEC EDGAR	company filings on EDGAR

3 OPERATOR

OPERATOR	Ovintiv
CIK / TICKER	1792580 / OVV
COUNTRY	US
STRESS (0-100)	20
FILINGS	SEC EDGAR filings

4 DECISION-MAKER

No operational decision-maker is published for this operator in the sources we verify. SEC filings name only board members and top executives, the wrong door for an operations conversation. Start with the published channel below, or reply to your order confirmation and we will warm-introduce you to the right operational contact (typical turnaround: 5 business days).

5 OUTREACH OPENERS

- Our monitoring flagged sustained high wind (curtailment-risk signal) in the uinta basin on 2026-06-10: an early indicator worth a conversation before it becomes a recurring cost.
- Stranded energy in uinta is monetizable on-site: flexible offtake (power gen, compute, compression) converts what Ovintiv currently writes off into margin, without waiting on pipeline or grid buildout.

6 COMPARABLE OPPORTUNITIES
